### Details

This event is to celebrate the gujrati festival of Diyas. There will snacks and dandiya available at the location please come enjoy a fun night with us.

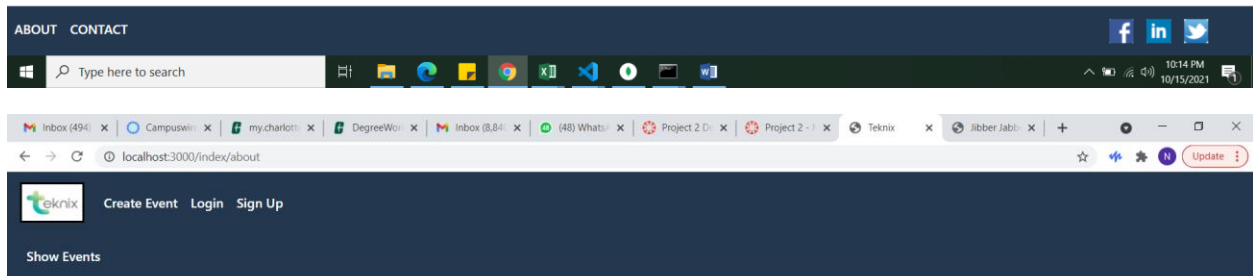

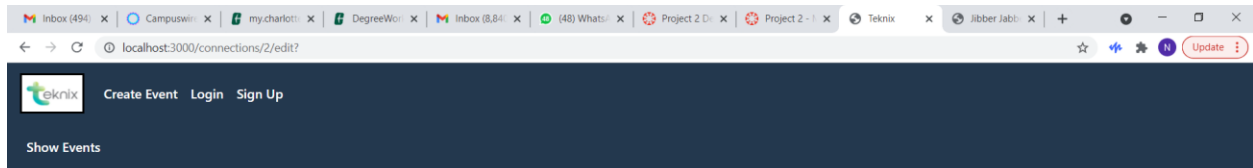

1. Explanation of status, stopping point, and issues if incomplete.

The project is complete from my side.

2. Discuss the easy and challenging parts of the assignment. How did you overcome all or some of the challenges?

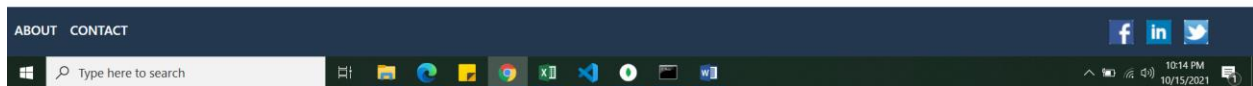

Converting the html to EJS and EJS syntax was difficult to grab. But referring the module 6 and internet helped.

Easy part was creating the MVC architecture and dividing the project.

## About Us

Teknix is a developing company which works with the different technologies to create a better future. We have offices all over the world. Our main business is the banking sector but we are continuously expanding.
